

## NOTICE OF AVAILABILITY OF DRAFT EIR

Project Title:	Sustainable Santee Plan: The City's Roadmap to Greenhouse Gas Reductions ("Sustainable Santee Plan")
Project Location – Specific; Identify street address and cross streets or attach a map showing project site (preferably a USGS 15' or 7 1/2' topographical map identified by quadrangle name):	The project area includes the City of Santee (City), which is located within eastern San Diego County, approximately 18 miles east of downtown San Diego. The City of Santee is bordered on the west and southwest by the City of San Diego and Marine Corps Air Station Miramar; on the south by the City of El Cajon; on the north by San Diego County; and on the east by unincorporated communities of Lakeside and Eucalyptus Hills. The City is approximately 16.5 square miles and supports a population of approximately 58,000 residents. See attached map.
Project Location – City:	City of Santee
Project Location – County:	County of San Diego
<p>Description of Nature, Purpose, and Beneficiaries of Project:</p> <p>The proposed Sustainable Santee Plan provides policy direction and identifies actions the City and community will take to reduce the generation of greenhouse gas (GHG) emissions consistent with State of California goals and targets. A variety of State-level actions including California Assembly Bill 32 (AB 32), Executive Order S-3-05 (EO S-3-05), Executive Order B-30-15 (EO B-30-15) have set goals and targets to reduce mass GHG emissions to achieve an 80% reduction in 1990-level GHG emissions by the year 2050. Intermediate goals and targets, set by the State of California, include reducing GHG emissions to 15 percent below 1990 emissions by 2020 and 40 percent below 1990 emissions by 2030. The plan would also work to achieve per-capita GHG emission levels by 2030 in conformance with Senate Bill 32 (SB 32) and the California Air Resources Board 2017 Scoping Plan.</p> <p>The Sustainable Santee Plan describes the existing regulations pertaining to climate change, calculates baseline GHG emissions produced within the City, projects GHG emissions, identifies reduction strategies to meet State GHG reduction targets, and calculates GHG emissions reductions with implementation of reduction measures.</p> <p>Based on the analysis and conclusions of the DPEIR, the City of Santee finds that the proposed project would not result in significant, unavoidable project-specific impacts associated with Aesthetics, Air Quality, Biological Resources, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Land Use and Planning, and Wildfire. Mitigation Measures for Aesthetics and Hazards and Hazardous Materials are proposed to reduce the impacts in these areas to less than significant with their implementation.</p>	

Project Site – Specify if project site is included on any list of hazardous waste facilities:	Citywide City of Santee. This would include sites listed on: California Department of Toxic Substance Control (DTSC): <a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a> State Water Resources Control Board, Groundwater Ambient Monitoring and Assessment (GAMA): <a href="http://geotracker.waterboards.ca.gov/gama/">http://geotracker.waterboards.ca.gov/gama/</a> State Water Resources Control Board (SWRCB), Water Data Library (WDL): <a href="http://www.water.ca.gov/waterdatalibrary/">http://www.water.ca.gov/waterdatalibrary/</a>
Place and time of scheduled meetings:	A time and location for consideration of the DPEIR and the Sustainable Santee Plan has not been set.
