DATE: January 6, 2025

SUBJECT: Development Impact Fees

Mayor and City Councilmembers,

At the November 13, 2024, City Council meeting the Council opened a Public Hearing regarding Development Impact Fees, (DIF). The council reviewed the Nexus Study Draft and potential fee increases as well as potential new fees. Following much discussion, the Council took action to continue the Public Hearing to January 8, 2025. It remains the staff's recommendation to adopt the fees consistent with the Nexus Study and approve the first reading of the ordinance.

Prior to the November Hearing, staff held a virtual meeting with the Building Industry Association, (BIA). The Association notified the city that they had no comments or concerns related to the proposed DIF modifications. Staff provided the Council with the BIA's latest published Fee Survey from 2021 at the November Hearing. On December 19, 2024. The BIA sent a letter to the city with new comments regarding the proposed DIF changes. Also on January 3, 2025, the Association published a new Fee Survey 2024 that covers only nine municipalities, San Diego County, and additional Special Districts. The report includes the same warning language strongly cautioning against trying to compare fees across jurisdictions due to differences in methodology and infrastructure needs, as was present in their previous survey.

The BIA letter had three recommendations for consideration by the city. First was a request to clarify grandfathering of fees for "deemed complete" projects. Staff do not support this recommendation. It would mean locking in fees when staff find an application complete. An application could be deemed complete for many years before actual building plans are submitted. Final plans often change square footage based on market conditions or for other reasons. With fees now based on square footage, this assessment is even more critical to be done when the square footage of a structure is known rather than estimated.

The BIA also recommended a more regular review of Development Impact Fees. Staff concur and have recommended that the city comply with the requirements of AB602, updating

Development Impact Fees at least every 8 years. This would require a new Nexus Study for each update.

The last recommendation the BIA made in their December 19 letter was to have Impact Fees phased in over a 5-year period. This would mean that the full funding of new development impacts would not be provided until after a period of four or five years has passed. Staff have calculated an estimate of anticipated development over the next two years to show the potential this financial impact may be. Once a project has paid their fees, that is the final amount. There is no going back to recapture these dollars. This funding reduction has an impact on the funds available to complete Council priority projects. Lower funding would likely necessitate delaying certain projects. Council's priorities, along with existing residents' expectations, would not be realized for an extended time period. This further compounds the risk of increased construction costs and inflation impacting the ultimate cost of capital projects.

Given this information, staff also understands the need to encourage development where feasible, and Council's desire to be business friendly. Therefore, attached are charts reflecting a phased approach to fee implementation over three and five years. The Drainage Fee is proposed as being reduced and this reduction must occur immediately, not phased in. If a phased-in choice is made, staff estimates that based on potential development for residential units alone the city could lose approximately \$715,000 for a three-year phase in and over \$2,850,000 for a five-year phased in approach. This is one path the Council could direct. Another is to keep full funding of top priority projects through correlated fees, and phase in other fees. This would allow for Council's priorities to continue collecting associated funds in the most timely fashion.

Staff provide this information as background for the Public Hearing scheduled for the January 8 City Council meeting. The BIA letter was received just at the Holiday Closure timeframe began and the new BIA Survey was received last Friday as the agenda was being completed. I am happy to discuss this topic as a part of a regular agenda review or independent meeting. Should Council have individual questions please feel free to contact me. Calculation of a phased-in approach for the updated Development Impact Fees (DIF). The charts below show the DIFs in aggregate. The phased in scenarios are based on a three-year and five-year phase in period. For this demonstration, the annual escalator, Construction Cost Index (CCI) has not been included. If a phased in approach were to be used, the annual CCI would be added to each fee so that while the decrease to the fee is still included in the calculation, the fee is up to date.

2024 Fee Survey

An overview of residential and commercial/ industrial fees charged by Cities and the County in the San Diego region

FEE SURVEY

Introduction

The Building Industry Association of San Diego County is pleased to produce the 2024 edition of the regional Development Fee Survey. This comprehensive report encompasses both residential and commercial/industrial fees. The survey offers an overview of development-related fees implemented by various cities, county, and special districts in San Diego County, serving as a valuable resource and planning aid for BIA members.

While the survey serves as a helpful starting point for understanding potential fee obligations, it should not be considered as a definitive analytical tool. While the BIA has diligently worked to ensure the accuracy of the Fee Survey, it does not guarantee absolute accuracy.

It's important to note that comparing impact fee levels among different jurisdictions is problematic. This is due to variations in methodology, approaches, assumptions, and service levels. A thorough evaluation will necessitate independent, site-specific analysis.

Methodology

The BIA Fee Survey was compiled using the results from surveys emailed to 9 Cities, San Diego County, 19 sewer districts, 21 water districts and 40 school districts. Fee survey assumptions can be found on page 3.

Editorial Comments

Fees continue to change. We will monitor and update as we see new information. The following cities did not participate in this year's study: City of Coronado, City of Del Mar, City of Encinitas, City of Imperial Beach, City of La Mesa, City of Lemon Grove, City of National City & the City of Poway.

TABLE OF CONTENTS

FEE CATEGORY	PAGES
Commercial & Industrial Fees	4-14
Residential Fees	15-27
Sewer Fees	28-30
Water Fees	31-32
School Fees	33-34

ASSUMPTIONS

Single Family Residential: The jurisdictions were asked to calculate the permit issuance, capacity and impact fees on a prototype 4 bedroom, 3 bath single family detached residential dwelling unit with 2,700 square feet of living area, a 600 square foot garage, 240 square foot patio (cover and walls); fireplace; gas & electric hookups; type V, wood frame construction. Along with engineering and processing fees on a prototype 50 lot, 10 acre subdivision with 100,000 cu yds. of grading.

Multi-Family Residential Townhome - attached:

A Townhome community of 100 units, all 3 Bedroom,2.5 Bath units at 1,600 sf., with a 400 sq. ft., 2 car attached garage, Type 5 wood frame construction and assumes a density of 18 du/ acre. Figure 10 buildings with 10 units each.

Multi-family Residential Condo - attached: A condo community of 250 units of 5 stories wood over 2 levels parking, type III construction, average unit size of 725 SF, subterranean parking, 1.5-2 acre site.

Apartment: Fees are based on a prototype 3 story, garden style, 250 unit (950 square foot/unit) apartment complex, Type 5 wood frame construction, surface parked in 10 buildings over 10 acres.

Multi-Tenant Industrial: Fees are based on a prototype 50,000 square foot, single story building with 20 restrooms on 3.59 acres. Figures assume type V construction with sprinklers and 25% build out. Occupancy type: Factory, low hazard.

Industrial: Fees are based on a prototype 50,000 square foot, single story building with 6 restrooms on 3.28 acres. Figures assume type V construction with sprinklers and 10% build out. Occupancy type: Factory, moderate hazard.

Research and Development (20% Mezzanine): Fees

are based on a prototype 50,000 square foot, 2 story building with sprinklers with 12 restrooms on 3.28 acres. Figures assume type III construction at 40% build out. Occupancy type: 80/20 Offices Factory, low hazard.

Flex Office: Fees are based on a new prototype 50,000 square foot, 2 story building with 12 restrooms on 3.1 acres. Figures assume type III construction with sprinklers at 100% build out.

Class A Multi-Tenant Office: Fees are based on a prototype 50,000 square foot, 3 story building with 12 restrooms on 2.73 acres. Figures assume type III construction with sprinklers at 100% build out.

Retail: Fees are based on a prototype 100,000 square foot, 1 story with 25 restrooms on 9.2 acres. Figures assume type V construction with sprinklers at 100% build out.

NOTE: The total cost for each project is subject to the sewer, water, and school fees. When calculating total costs, please refer to the Sewer, Water and School Fees pages (Page 28-34) for the best estimate.

Comments:

Comments: (1) Includes admin. fee of \$220. Assumption that there are equal amounts of Men and Women Restrooms, with Men's including 2 Urinals, 2 Toilets, and 2 Sinks and Women's including 4 Urinals, 2 Toilets, and 2 Sinks and Women's including 4 Ubiets and 2 Sinks. Men's = 16 EFU; Women's = 20 EFU. (2) Additional \$265 per EDU if project is in Poggi Canyon sewer basin; or \$1,800 per EDU if project is in Salt Creek sewer basin. EDU is colladet as follows: For Commercial/Industrial 9.43 EDUs per Acre, For Multi-story Commercial in Poggi Canyon 0.272 EDU per 1,000 SF. (3) Contact Sweetwater Authority or Olay Water District for rates. (4) Assumes one sprinkler/150 square feet. (5) The methodology for calculating Traffic Fees was changed in 2018 from a per acre rate to a per ADT rate for commercial and industrial uses. (6) As described in Chula Vista Municipal Code section 3.54.060, for the purposes of calculating ETDIF, traffe generation rates for commercial ratel if and uses are are rare duced by 72% to recognize the capture of locally-generated residential traffic in the eastern portion of the City. This reduction is applicable to the ETDIF only.

only. (7) Does note include Poggi Canyon or Salt Creek Sewer Basin Fee.

(*) To clarify the response for Single Family Dwelling (SFD) building permit fees, we included fees for a custom single family residence, tract model single family residence and tract subsequent phase single family residence.

(1) Patio covers under 300 sq. ft. are exempt from permit/plan check.

(2) Plan check fee for custom home.

(3) Plan check fee for Model Home/Subsequent fee for Production Home.

(4) Permit fee for custom home.

(5) Permit fee for Model Home/Subsequent fee for Production Home. (6) Check with water/sewer or school district based on your project location.

(a) Average based on various districts. Fees range from \$6,557 - \$13,206. (Single Family)

(9) Average based on various districts. Fees range from \$4,248 - \$14,349. (Multi-Family)

(10) Average \$1.31/sqft based on various districts. Fees range from \$0.80 - \$2.48/sqft for fire mitigation fees. (11) \$0.62/sq, ft. average of 9 special drainage areas.

Re: Recommendations to Proposed Revisions to Development Impact Fees

Dear Mayor Minto,

On behalf of the Building Association of San Diego County (BIA) I'd like to provide our comments and recommendations regarding the City of Santee's (City) proposed Development Impact Fee revisions. We appreciate City staff taking the time to provide a briefing of the proposal to our organization, and answer questions and the opportunity to engage in this important discussion as we work together to support smart, sustainable growth and ensure that development continues to meet the needs of the community.

After careful review of the proposed revisions, the BIA would like to offer the following recommendations for your consideration:

1. Clarification of Grandfathering Provisions for Current Projects

We strongly recommend that the City clarify and formalize the grandfathering provisions for projects that are currently in progress. Specifically, we request that projects "deemed complete" under the City's definition of this term be exempt from any new or increased development impact fees that would otherwise apply under the proposed revisions. This would provide much-needed certainty to developers who have already incurred significant costs based on the existing fee structure. Clear guidelines around what constitutes "deemed complete" should be provided to ensure consistency and transparency in the application of these provisions.

2. Phase-in of Development Impact Fees Over a 5-Year Period

While we understand the need for updated fees to reflect current infrastructure and service demands, we also recognize the potential financial burden that a sharp increase in fees could place on ongoing and future development projects. To mitigate this impact, we recommend that any fee increases be phased in over a 5-year period. This phased approach will allow developers to adjust their project budgets and timelines accordingly, while also ensuring that the City can gradually implement the updated fees without disrupting development activity. A gradual increase will also help maintain a stable housing market and encourage continued investment in the community.

3. More Regular Review of Development Impact Fees

Finally, we encourage the City to adopt a more frequent and structured process for reviewing and adjusting development impact fees. The current approach of infrequent adjustments can create uncertainty and result in significant,

unpredictable changes in fees. We recommend that the City conduct a formal review of the DIF schedule every 2 to 3 years, rather than waiting for extended periods. This will allow the City to more promptly respond to changes in economic conditions, inflation, and evolving infrastructure needs, ensuring that the fees remain fair, reasonable, and aligned with actual costs.

We believe that these recommendations will help create a more balanced and predictable development environment in Santee, ensuring that new projects can continue to move forward while also meeting the City's infrastructure and community service needs.

The BIA is committed to working collaboratively with the City and its stakeholders to help guide these important decisions. We look forward to discussing these recommendations in further detail and are available to meet with staff or Council members to provide additional input or clarification.

Thank you for your time and consideration.

Sincerely,

-foitblik
